CocoaPods Cheat Sheet

Commands

```
1   $ sudo gem install cocoapods      #  Install CocoaPods
2   $ cd desktop                      #  Change directory
3   $ pod init                        # Create a new file named Podfile
    automatically
4   $ vim   Podfile                   # Edit Podfile vi/vim
5
6   $ pod install                     # Install dependencies
7
8   $ open MyApp.xcworkspace          # Open MyApp.xcworkspace
9
10  $ pod update                      # Update dependencies
```

Podfile

```
1   platform :ios, '13.6'
2
3   target 'MyApp' do
4     # Comment the next line if you don't want to use dynamic frameworks
5     # use_frameworks!
6
7     pod 'Alamofire', '~> 5.1'
8     pod 'SwiftyJSON', '~> 2.3'
9     pod 'SDWebImage'
10    pod 'Masonry'
11
12  end
```
